Swachhata Hi Seve

Dr .Sheethal, Prof and HOD Community Medicine, welcomed all the dignitaries and participants and spoke on importance of "Swachh Bharath Mission" and its importance. Dr.Pravin G.U, Principal spoke regarding continued maintenance of cleanliness in our routine day to day activities and our surroundings which prevents many diseases. Commissioner Mr. Puttaswamy appreciated the initiative taken by the medical college for the cause of society and said they have organised many programs and initiative to make channapatna a clean city. Slogan: Swachh Bharath Abhiyan Swachh Bharath Kalyan, impressed all. Slogan: Swachhata Seva Ulisuvudu Jeeva (meaning service towards cleanliness saves lives) also very much appreciated.

1st year MBBS students Orientation and white coat ceremony

"Sweekar" Inaugural function for the new MBBS students 2023-2024 batch of Sri Chamundeshwari Medical College, Hospital and Research Institute was held on 20th September 2023, this marks the beginning of the Foundation course. There was overwhelming participation from the students, their parents, dignitaries and faculty members, who all graced the occasion with their enthused presence. The ceremony was presided over by the dignitaries, HODs of all the departments, staff and resource persons for foundation course. Once all the students donned the white coat, modified Charaka Shapath was administered and they took a pledge to become a responsible and compassionate doctor.

Foundation Course for 1st MBBS students 2023-24 batch

Medical education in India requires training in a wide spectrum of domains that involves exposure to human interactions and interpersonal relationships in various settings including hospital, community, clinics etc. The undergraduate medical education programme is designed with a goal to create an "Indian Medical Graduate" (IMG) possessing requisite knowledge, skills, attitudes, values and responsiveness, so that he or she may function appropriately and effectively as a physician of first contact of the community while being globally relevant. Keeping in line with the ideas of NMC the Foundation Course time table was prepared well in advance. First week was entirely dedicated to foundation course. There was a good mix of all the modules and activities were well planned and students' active participation was ensured. Second week onwards the regular theory and practical classes started, so the foundation course topics were covered after the college hours. All the modules of foundation course will be covered over a period of 4 to 5 months as per the direction of NMC.

Health Education on Road traffic Accidents and Road Safety

World Trauma Day, an annual global initiative observed on 17th October 2023, highlights the profound impact of trauma on both individuals and societies. It underscores the importance of injury prevention, effective medical response, and psychosocial support, fostering a culture of safety and resilience in the face of traumatic events. In addition, our institute has proposed and implemented an innovative approach to celebrate the Dasara festival by conducting health education activities addressing important public health problems, one such problem of concern being Road traffic Accidents and Road Safety.

"MOON RAD-CON"

8th November 1895 "Wilhem Conrad Roentgen" discovered the X-rays. To commemorate this day & celebrate the success of "CHANDRAYAN-3" department of Radiodiagnosis, SCMCH&RI conducted "ROENTGEN DAY CME" "MOON RAD-CON" on 8th November 2023. It continued with series of guest lecturers starting from Prof.Dr.Pravin who spoke about discovery of X-rays. 120 delegates registered for the program and it was well attended.

Health education on "Adolescent Mental Health"

On the occasion of World Mental Health day, Department of Community Medicine had organised Health awareness programme on "Adolescent Mental health" for Govt. High

School students, K Honnalagere, Govt High School, Thoreshettihalli, Maddur taluk on 17th, 27th October, 2023. In addition, as our institute had proposed an innovative approach to celebrating the Dasara festival by conducting health education activities addressing important public health problems, one of which was Adolescent Mental Health. Dr Amulya, Dr Manuja LM, Associate professor, Department of Community Medicine were the speakers for the session. She spoke on mental health mainly focusing on 9 simple tips to improve mental health and well-being which included sleep, physical activity, screen time, to connect with nature and on healthy food. There was an activity based learning for the students where they were taught them how to meditate and the importance of meditation in school life. The program was successful in imparting the knowledge regarding the importance of mental health with 9 simple tips among school students. Around 200 students from 8th, 9th and 10th standard participated actively in the program.

World Antimicrobial Awareness Week

World Antimicrobial Awareness Week (WAAW) is a global campaign that is celebrated annually from 18th to 24th November to improve awareness and understanding of AMR and encourage best practices among the public, Health care workers and policymakers, who all play a critical role in reducing the further emergence and spread of

AMR. World antimicrobial awareness week was celebrated in Sri Chamundeshwari Medical College, Hospital & Research Institute from November 18th to 24th 2023, under the theme "Preventing the antimicrobial resistance together" organized by Department of Microbiology. On this occasion we conducted several competitions and awareness programs. Posters competition was organized for 1st year MBBS students, Community awareness in collaboration with community medicine department was done, quiz competition for students and Doctors, AMR awareness Programme for General public (Patients and attenders) was done at patient waiting area in OP block and IP block, all the staff were told to "GO BLUE for AMR" in support for world AMR awareness, by wearing blue attire and photos were taken. All Doctors were told to take the pledge - "I will be an Antibiotic Guardian and stop its misuse/overuse", by signing on the pledge board which was kept in OP block lobby on 24th Nov 2023.

Family Adoption Programme

The National Medical Commission (NMC) has mandated Family Adoption Programme (FAP) for MBBS students from 2022 which aims at providing an experiential learning opportunity to Indian medical graduates towards community-based health care and thereby equity in health. Sri Chamundeshwari Medical College Hospital and Research Institute has selected Shivapura Village, Maddur Taluk, Mandya district for Family Adoption Programme. An inauguration programme for FAP was organised by the Department of Community Medicine, SCMCH & RI on 30th of December 2023 at Shivapura Village. Each student were allotted 3 families which will be followed up for 3 years. So totally 450 houses in Shivapura village were included for this year's programme. Students will visit the adopted families every 4th Saturday of the month to collect sociodemographic data, details regarding any health problems among family members will be recorded. Individuals who need further evaluation will be investigated & treated at our hospital.

WORLD DIABETES DAY
